HENNIGSDORF / BERLIN, GERMANY, APRIL 10TH 2015 — A lot of people are interested in 3D printing. A lot of people would love to try 3D printing, if it still weren't for the relatively high entry-level prices. [MeltWerk](#), a new 3D printing service, is here to change that. With prices never seen before, you can save up to 85% compared to other 3D printing services. Confident of their offer, they even give all customers a Europe-wide best price guarantee. MeltWerk's service is based on technology from German 3D printing company [trinckle 3D](#).

“3D printing promises to be the liberalization of manufacturing,” says *trinckle 3D* CEO, Florian Reichle. “But with desktop 3D printers and regular 3D printing services still being expensive and complicated to use, this isn't true for most of us just yet. With *MeltWerk*, we want to deliver on that promise. We want to make 3D printing affordable for everyone.”

That is why every *MeltWerk* purchase will come with a best price guarantee. If you – within 14 days after your order – find a better offer from a competitor, you will get back the difference plus 1%.

In order to offer the best price possible, but still provide high, industry level quality, the team of *trinckle 3D* streamlined all of their production processes. They developed sophisticated software for process automation, and they focused on what 90% of their customers already want: plain white Polyamide (PA12) prints using Selective Laser Sintering (SLS).

Due to the unique combination of quality and affordable prices, *MeltWerk* aims at various groups: architects, product designers, artists and model builders, as well as students, makers, kids, technophiles, and simply everyone, who wants to experience the fascination of 3D printing themselves.

**About trinckle 3D** — *trinckle 3D* is a leading provider of 3D printing solutions in Germany. Our 3D printing services empower businesses and consumers alike to turn their digital ideas into real 3D products. Furthermore, *trinckle 3D* creates web-based software solutions, which enable anyone to customize products to an extent never seen before by using simple web interfaces.

*trinckle 3D* was founded by Florian Reichle, Dr. Marlene Vogel and Dr. Gunnar Schulze at Freie Universität Berlin in January 2013. Investors and supporters include an early stage funding from [BFB](#) (*Frühphasenfonds Brandenburg*) and Berlin-based Venture Capital Company [bmp](#).
